

EZ Spanner™

4-Hole Ratcheting Hydrant Wrench

The **Only** Multi-Function Ratcheting Fire Hydrant Wrench

The only Multi-Function "Ratcheting" fire hydrant wrench, fully customizable to any Fire District's needs! The high strength aluminum body and stainless steel socket gears and cover plate, make this a HEAVY DUTY tool that is built to last! The built-in extension handle provides that extra leverage needed to open the most stubborn hydrants. Custom hooks on top are made for a snug fit on all sizes of hose couplings and fittings, and eliminates the "universal" style hook that commonly slips off the lugs!

"Reduces injuries by allowing hydrants to be opened from a safe position"

Weight: 5.5 lbs Length 19 1/2" closed - 23" Open

Choose from 7 different socket sizes

Sockets can be made to any size and are interchangeable in their positions

Extendable handle

3 Custom designed hooks

Customize Any Ratcheting Wrench

All ratcheting gears are interchangeable, and can be arranged in any order you wish. Put your most commonly used size at the top for the best leverage.

EZ Spanner™

5-Hole Non-Ratcheting Hydrant Wrench

The EZ Spanner™ Standard Hydrant Wrench includes 5 popular choices to ensure you have the right size to get caps and valves opened. The unique design puts 2 of the most common sizes at the top of the wrench for maximum leverage. The lightweight wrench is made from high strength aluminum (sometimes referred to as Aircraft grade) and has a very natural, comfortable feel in your hand due to the wider ergonomic handle design. The Standard Handle is designed to be used with the EZ Spanner™ Breaker Bar for added leverage. This combination provides the maximum leverage available for opening hydrants.

Weight: 1.5 lbs Length 16" Width 4" Thickness 3/4"

3 Custom designed hooks

Compatible Breaker Bar Accessory Item #BB-100

EZ Spanner™ Adjustable Hydrant Wrench

The EZ Spanner™ Adjustable Hydrant Wrench combines innovation and function to help speed up hydrant operations. The simple “Quick-Slide™” Mechanism enables the wrench to be adjusted from the smallest to the largest pentagonal or square shaped caps and valve stems. This advantage is critical when your standard wrench does not fit, such as in mutual aid situations. With the wrench in the fully open position, simply push the button, slide the base to ensure a tight fit and the tool automatically locks into position! The wrench is constructed of high grade aluminum and stainless steel which virtually eliminates the rusted, loose fitting screw style, that has been used for generations. The “Standard Handle” is designed to be used with the EZ Spanner™ Breaker Bar for added leverage. This combination provides the maximum leverage available for opening hydrants.

EZ Spanner™ Mini-Goat™ Pocket Tool

The Mini-Goat™ Pocket Tool was designed as a multi-purpose tool to be carried in your pocket. It incorporates the EZ Spanner™ custom hook design, into a small, slim, hand tool. It is especially useful at a pump panel where it fits into tight compact spaces, unlike other “standard” hydrant wrenches. Use the custom hooks to tighten and loosen fittings and couplings. The two convenient gas shut off’s give you options for getting the tool into tight spaces making it easier to turn the valve. Down the center of the wrench, is an incorporated multi-step nut wrench, for a quick fit onto standard nuts. This wrench is also great in the field where it can be used to tighten hose couplings, and for a variety of other uses. It’s a strong aluminum, very lightweight and durable tool.

Length 9 7/8" Width 4 1/4" Thickness 3/8" Weight 4 oz.

EZ Spanner™ Breaker Bar

The slide on extension bar is a very useful accessory that is compatible with all EZ Spanner™ "Standard Handle" tools. Made from high strength, solid aluminum, this tool gives you an immediate option for adding leverage to those very hard to open fire hydrants. Simply slide it on the handle and go to work! Two convenient gas shut off's are also included and provide a quick and easy solution to shutting down the meter.

Length 16" Thickness 1" Weight 2.5 lb

Better Tools, LLC (818) 856-1522 www.ezspanner.com

EZ Spanner™ Hose/Tool Bag

The EZ Spanner™ Hose/Tool bag is made to complement the EZ spanner™ line of tools, and will also work for most of the common hydrant tools in the field. The bag attaches directly to your supply hose with 3 Velcro straps, and will even expand with your hose when it's loaded! It holds a variety of your selected hydrant tools. The bag is lightweight, yet constructed of a very durable, rip-stop waterproof material, specially designed for the job at hand. This tool bag keeps your tools secure with a heavy duty velcro closure, yet opens easily with one pull of the opening strap! When not in use, your tools remain completely covered from the elements,

Length 22" Width 8" Weight 2 lb.

EZ Spanner™ Multi-Tool Mounting Bracket

The EZ Spanner™ Multi-Tool Mounting Bracket will hold a combination of 4 Wrenches and 2 Breaker Bars. The light weight aluminum bracket can be mounted on an exterior panel or interior compartment.

Better Tools, LLC (818) 856-1522 www.ezspanner.com

EZ Spanner™ Individual Socket Sizes

The EZ Spanner™ Ratcheting Hydrant Wrenches can be built with any combination of the following sockets. They can be placed in any order, allowing companies to configure the most commonly used size at the top of the wrench for the most leverage.

Pentagonal: 1 1/8" 1 1/4" 1 3/8" 1 1/2" 1 5/8" 1 3/4" 1 7/8"

Square: 3/4" 1"
