Cart Pump

- Deliver water by placing the intake hose/strainer into a lake, pond, swimming pool etc.
- The Cart Pump can deliver a fast fire fighting stream of **70 GPM @ 10PSI, 65 GPM @ 50 PSI, 45 GPM @ 100 PSI, and 35 GPM @ 125 PSI** in difficult to access areas, as well as aid with drafting and water re-supply operations.
- A useful piece of equipment for fire departments, industrial fire brigades, and even residential use, commercial marinas and more.

customizable
/'kʌstəmə'zəbl/
adjective

- used to describe something that you can change according to a customer's or user's particular needs

We build our Skid Units with only the best components available on the market. Our Skid Units are built with many standard features and a multitude of options to choose from to customize your own unit. Finally, every single skid units is inspected and tested to make sure the product you receive meets your expectations.

- CET designs, engineers and manufactures our skid units from the ground up
- Customizable to meet your needs
- ISO 9001 Certified
- Know-How + Dependability + Efficiency = solid product at an affordable price.

Quick Delivery Skid Units Models

Attack Pac

Sets the standard for Skid Unit mobile fire attack for firefighting agencies in more than 44 countries.

Econo Pac

Simple to operate, great for ranchers, farmers, homeowners in wild land interface areas and smaller fire agency vehicles.

Forest Pac

Great for Wild and Forestry fire fighting with larger capacity NFPA tank.

Ready Pac

Features popular 6hp-Twin pump and is similar to Attack Pac, but without Booster Reel. Great for urban interface firefighting... car fires, dumpster fires and small room & contents fires.

Skeeter Space Pac

Small and nimble, great for firefighting/ EMS use on ATV and UTV vehicles when navigating through large crowds of people at events, or in remote areas where pick-up size trucks are too big to go through.

CET Quick Attack Units

Ford Cab & Chassis

- Designed, engineered and manufactured with CET craftsmanship and pride from the ground up.
- No two CET Brush Trucks are exactly alike because no two fire departments are exactly alike. Highly customizable-CET makes our trucks to meet your fire departments specific needs.
- Reliable, dependable, rugged
- ISO 9001 certified

know-how
 \ˈnō-,haü\
 noun

- knowledge of how to do something well
- knowledge of how to do something smoothly and efficiently

The **CET CAFS** provides a self-contained, gasoline powered, "slide-in" type compressed air foam system (CAFS) unit.

The CAFS unit is designed to fit into the back of a standard length and width pick-up truck body, to discharge water only, air only or compressed air foam from the same discharge outlet. In addition, the consistency of the compressed air foam (expansion ratio), wet/dry is fully adjustable.

Compressed Air Foam System **CAFS**

Advantages of A CET CAFS

- Completely designed, engineered and manufactured by CET craftsmen
- Smart design means ease of use and ease in training
- ISO 9001 Certification
- Great when used with wild land/urban interface attack
- Class A foam increases efficiency and conservation of water supply.

ef-fi-cient
/ə'fɪʃHənt/
adjective

- achieving maximum productivity with minimum wasted effort or expense
- working in a well-organized and competent way

CET Fire Pumps manufactures a variety of foam trailers from 150 to 2,000 gallons. These versatile trailers are ideal for use in industrial, commercial, municipal and forestry environments. Foam trailers provide a very effective tool for airport fuel storage and power plant installations.

- Completely designed, engineered and manufactured by CET craftsmen
- ISO 9001 Certification
- Customizable to your specific needs
- Know-How + Dependability + Efficiency = solid product at an affordable price.
- Class A Foam and Class B Foam increases efficiency and conservation of water supply

in-no-va-tive

*/'inə,vādiv/
adjective*

- introducing new ideas; original and creative in thinking.

CET offers quality and value with a unique Glider Kit program. Brush truck to Quick-Attack. Engineered, manufactured and assembled for your convenience. A Glider Kit is composed of a CET drop-in, CET polypropylene or aluminum compartments and a CET custom heavy duty Fire Application flatbed.

Advantages of A CET Glider Kit

- The Glider Kit package can be installed on a cab and chassis with supplied "U" bolts, Teflon "Dielectric" pads and brackets. This design allows the body and flatbed to withstand greater levels of stress that can distort other commercial style flat-beds. A truly "OFF ROAD" flatbed!
- A modular design allows removal from the chassis for major repair or mounting on a new chassis.
- The flatbed design offers unmatched, exclusive, CET features.
- Components are pre-assembled, pre-plumbed, pre-wired, and shipped to the OEM in a self-contained, tested unit.
- One manufacturer, one shipment to track, one service and warranty source.
- Quick delivery program.

Quality and Value Every Time

MANUFACTURING
Since 1908

ver-sa-tile
/ˈvɜrsədɪl/
adjective

- able to adapt or be adapted to many different functions or activities..

Agriculture

CET products are routinely used for irrigation to move water where it is needed as well as application of the water. Cleaning of livestock pens, and wash down of animals as well as fire suppression are just a few notable uses.

Concrete

The possibility of mounting CET portable pumps on individual mixer trucks allows for immediate clean up after delivering concrete which saves fuel and time as the drivers then don't have to return to a centralized location for clean up – which allows for more deliveries or the course of days, weeks months and years.

Fire Fighting

Originally made for municipal fire fighting agencies, CET pumps can aid private sector companies with loss prevention by giving those companies quick fire response capability in remote locations where response time by government fire fighting agencies may be hampered by distance or environment/geographic obstacles.

Forestry

Timber related companies or agencies operating in remote woodland locations can benefit from the innovations, and rugged designs of CET

Marine

CET is well suited to aid the marine industries by providing pumps for fire boat operations, de-watering operations to get water out of the hull, to providing portable wash down capabilities.

Mining

CET's rugged portability has helped the mining industry with wash down of mining trucks and equipment, fire fighting at any level of a mine, de-watering to access submerged areas or equipment and more.

Petro-Chem

CET pumps provide versatility. With one purchase a CET pump can provide remote fire fighting and wash down capability, de-watering and water movement all in one unit. A good value for any company.

Race Track Safety

Whether rescuing a race car driver, protecting against fire in the food vendor section of any venue, or de-watering an infield, CET is there to help.

Railroads

The rail industry uses CET pumps and equipment for many of the reasons listed for other industries in general, but additionally, rail road companies apply CET pumps and foam systems on maintenance cars while working on the tracks to help prevent grass fires that routinely start due to sparks etc. caused by everyday operations in the field.
